MWFR helps women look better (and feel wonderful!) one complexion at a time— with cosmetic microcurrent for skin rejuvenation and the luxurious, all-natural epiCARE Skincare range of products.

100% NATURAL AND 100% GOOD FOR YOU

epiCARE Skincare superior skin products unite simplicity and purity for anti-aging properties. We use only the finest natural ingredients to maximize that fresh, plump skin feel obtained from rejuvenation treatment.

For beautiful, resilient skin, rely on the MWFR Five Step epiCARE Program. You'll never want to risk anything else.

Five-Step epiCARE Skincare— for naturally beautiful skin

1. Start with the epiCLEANSE Facial Cloth. Wet the cloth and gently clean your skin until all makeup and grime are gone. Use both morning and night to give a fresh feel and exfoliate without drying skin out.
2. Next, spray epiMIST on your still damp face to revive and restore.
3. **AM Program:** Apply epiCARE Moisturizing Oil on your freshly misted skin. This enhances and moisturizes without a greasy feel.
PM Program: First apply epiSILK Toning and Lifting Serum to firm and moisturize.
Evening only: Then apply the epiCARE Moisturizing Oil to seal in the Vitamin C serum of epiSILK and help it do its remedial work. The epiSILK Serum is so effective, use it in the evening only for three weeks out of every four—it keeps toning and tightening.
4. This step is for dry and normal skin. Apply epiMOIST to clean skin. It can also be used alone over epiSILK and on top of epiCARE in the morning. In the evening, apply epiSILK, epiCARE, and epiMOIST to lock in moisture and act as a treatment overnight.
5. Next, use ultrarich epiLUX Neck and Décolleté Serum. Use at least twice a day, morning and night, to keep your neck and dec firm and youthful.

PLUS—to make your body feel as youthful as your lovely face, shower and bathe with epiWASH Body Wash and Shampoo. This renews and refreshes from the top of your head to your toes to give every inch a deep clean and the same all-over benefit you're giving to your face. It's also great to shampoo color-treated hair. Add 10 pumps of epiRICH body oil to your bath. When you step out of the bath, air dry and apply epiCREME to lock in moisture.

epiCARE Skincare
