**Maxine Warsh** FACIAL REJUVENATION

REPRINTED from "Female Focus": The 1st Women's Magazine on the Costa Blanca

*Throughout the ages, people have experimented with treatments intended to enhance their appearance and slow the ageing process. From the early Egyptian's use of kohl and mineral pigments to the tightly drawn corsets of the Victorian era, women have endured much in the name of youth and beauty. Micro-current is a diamond-in-the-rough when it comes to wellness and anti-aging.*

#### **WHAT IS MICRO-CURRENT?:**

Micro-current is a low level of electrical current that mirrors the body's own natural current. It is proven and accepted properties and potential range of applications from wound healing, muscle rehabilitation and lymphodema continue to assist medical practitioners with amazing results. As an esthetician, micro-current offers us the opportunity to fight ageing from the inside out without even going near a surgical knife. Non-surgical face-lift is an increasingly popular way for men and women to

## Hi-Tech Skin Care

In the modern world, people are fortunate to be able to turn to technology for their fountain of youth, and one of the most important innovations to have sprung from this well of technological advances is the use of micro-current.

improve their facial appearance. Research has shown that micro-current therapy raises the level of adenosine triphosphate (ATP) and amino acids in cells, both of which accelerate cellular repair. Examination of skin tissue treated with micro-current shows a 45% increase in the number of elastic fibres in the dermis, and the length of the fibres on average doubled. The collagen thickness in connective tissue increased 10%, and the number of blood vessels increased by 35%. The application of micro-current to the skin produced a firmer and tighter feeling on the skin surface due to muscle re-education. We all know that without exercise muscles lose their shape and tone. This is extremely noticeable on the face as it

is the one place we cannot hide. As facial muscles are connected directly to the skin, when they do begin to lose elasticity they drag the skin down with them which results in loose sagging skin, wrinkles and fine lines.

For your treatment your therapist will book your appointment in their studio, then pamper you with 1 hour of painless, relaxing electronic facial toning. In addition, they may use the epiCARE™ skin care line of products, which are a totally natural range of products that do not contain any oil, are pH balanced, soap free, hypo-allergenic, 100% pure and natural, homoeopathically prepared and PROUDLY NOT TESTED ON ANIMALS. All the epiCARE™ products are available to buy to use at home. One off treatments are a great boost to the skin and are priced at 35.50 euros. Micro-current is excellent for acne sufferers and will promote healing in the skin. Courses of 12 for full non-surgical face lift benefit from a discount. *Please note that treatments cannot be given to pregnant women or clients with pacemakers.*
